

Quarterly Sales Report

Overview

This report provides an overview of the quarterly sales performance for five different products across various regions. The table below illustrates the sales figures for each quarter, allowing for a comparison of product performance over the fiscal year.

Sales Data Table

Product	Region	Sales (Q1)	Sales (Q2)	Sales (Q3)	Sales (Q4)
Product A	North	12,000	15,000	13,500	14,000
Product B	South	10,500	11,000	12,500	13,000
Product C	East	8,000	9,500	10,000	11,500
Product D	West	9,000	8,500	9,200	9,800
Product E	Central	7,000	7,500	8,000	8,200

As demonstrated in the table, Product A led the sales in the North region with consistent performance across all quarters. On the other hand, Product E showed the lowest sales figures, particularly in the Central region. The data suggests that while some products perform steadily, there is room for growth in specific regions, particularly for products like C and E.
